

NORTHAMPTON CLINIC – THERAPIST BIO

For more information visit our website www.northamptonclinic.com or call 01604 632232

Rodrigo Diaz Martinez

I am a qualified Podiatrist and qualified Nurse. I studied both in the University of Malaga, completing 3 years of Nursing in 2009 and 4 years of Podiatry in 2015.

I am registered with the Health and Care Professions Council (HCPC), the Society of Chiropodists and Podiatrists (SCPOD) and the Nursing and Midwifery Council (NMC). I have also studied a master degree in Pharmacology in the University of Valencia.

I have played sports from a young age and consequence of this I have suffered plenty of different injuries especially with my feet and ankles. This is one of the main reasons why I decided to specialise in Podiatry so I would be able to offer the best possible treatments to people with problems in their feet or any other part of the body as a consequence of a problem related to the way their feet work or the way they walk.

Northampton clinic has given me the great opportunity of being part of their team. Some of the services I can offer are these.

- Diagnosis and exploration where I will try to find the root of your problem.
- Treatment of basic affections of the skin like hyperkeratosis (hard skin), helomas (corns), tinea pedis (fungal infection), etc.
- Treatment of nail conditions like onychocryptosis (ingrown toenail), onychauxis (thickened nails), onychomycosis (fungal infection of the nail), etc.
- Biomechanical exploration (gait analysis, footprint, balance, etc) where I will try to find if you have a mechanical condition that can be treated with orthopaedic devices like insoles.
- Manufacturing of 3D custom insoles using the latest concepts and knowledge in this speciality.
- Minor surgery of the nail and soft tissue. Definitive surgical treatment of the ingrown toenails adapted and designed to each patient.
- Diabetic foot, neurovascular exploration and treatment of ulcers.
- Home, nursing homes and hospital visits also available.

To book an appointment ring the Northampton Clinic and if you have any enquiries contact me on 07831645272.
