Christine Porter

Hi I'm Christine. I'm a podiatrist who takes people of all ages from having pain and discomfort in their feet to feeling more comfortable and happy.

My clients have walked away saying things like; 'I feel like I'm walking on a cloud now 'and 'My feet are so much better '

I can treat:

- Corns
- Callus
- Problem nails
- Verrucaes (Planter warts)
- Foot pains such as for foot pain or heel pain while walking
- I can assess people walking with gait analysis
- Looking at the foot position while standing as well can help diagnose foot pains
- I can order and make insoles
- I can treat diabetics and people with immunosuppression.

I have been an NHS podiatrist for 14 years and am working towards gaining my masters in advanced practitioner podiatry. I have now left the NHS to concentrate on building my own business.

I am a mum of 2. I love my job but working part time at Northampton clinic gives me time with them as well, which is great!

I Look forward to meeting you, just call in to make your appointment.
