Laura Baker Holland

Laura has worked at the clinic as a massage therapist for 5 years whilst completing her 5 year-long degree in Osteopathy and is now fully fledged as an Osteopath having graduated from University College of Osteopathy.

Laura treats clients from the age of 12 and particularly likes working with older adults (65+) who think that aches and pains are simply part of getting older. The satisfaction of seeing someone realise they can feel more comfortable and improve their abilities is extremely rewarding. She has a special interest in treating people suffering with headaches, offering a thorough assessment in order to establish if a headache originates from musculo-skeletal tensions or some other cause. She also enjoys treating pregnant ladies, helping them cope whilst their bodies are busy doing something amazing. She looks forward to meeting and helping you.
